

SYMMETRY™

LOVE LIFE, LIVE LIFE.

VNS Therapy®, a different approach to Treatment-Resistant Depression (TRD)*

The lead passes mild stimulation to the vagus nerve, which in turn sends electrical pulses to areas of the brain associated with mood regulation.

Vagus Nerve

Lead

Generator

SYMMETRY is a small device that is placed under the skin in a short outpatient procedure, similar to a pacemaker.

*The VNS Therapy System is indicated for the adjunctive long-term treatment of chronic or recurrent depression for patients 18 years of age or older who are experiencing a major depressive episode and have not had an adequate response to four or more adequate antidepressant treatments.

The most commonly reported side effects are hoarseness or changes in voice, prickling or tingling in the skin, sore throat, and shortness of breath. The most common side effect from the implant procedure is infection. Most side effects were well tolerated and were less noticeable over time.
